

**Designation:** Software Development Engineer I

**Location:** Bengaluru

### **About us**

Welcome to Meesho, where every story begins with a spark of inspiration and a dash of entrepreneurial spirit. We're not just a platform; we're your partner in turning dreams into realities.

### **Our Mission**

Democratising internet commerce for everyone - Meesho (Meri shop) started with a single idea in mind to be an e-commerce destination for the next billion Indian consumers and enable 100 million small businesses to succeed online. We provide sellers with a range of industry-first benefits such as zero commission and an affordable shipping cost., growing their business by tapping the company's massive customer base, state-of-the-art tech infrastructure, pan-India logistics at cost through third-party logistics providers and in-house logistics arm Valmo in an 'Everyday Low Cost' channel for sellers. Affordable, relatable merchandise mirroring local markets has helped us make inroads with first-time internet users in the country. We cater to an underserved and unique customer base and cover serviceable pincode in the country. Our unique business model and continuous innovation has enabled us to become the first Indian horizontal E-commerce company.

### **About the Team**

When 5% of Indian households choose to shop on Meesho, engineering at scale isn't optional, it's mission-critical! Millions of orders. Zero downtime. Every single day - That's the kind of engineering muscle that forms the backbone of Meesho's disruptive edge. At Meesho, engineers don't just ship code — we own the problem, shape the solution, and drive meaningful business outcomes. Working as true co-owners with product and business teams, engineers at Meesho pair strategic thinking with deep technical execution.

We move fast, value progress over perfection, and treat every failure as a chance to grow. Our teams operate with a strong Founder's Mindset, taking ownership and pushing boundaries every day. As we scale rapidly, people remain at the heart of everything we do. Regular 1:1s, open dialogue, and a strong culture of continuous learning are central to how we grow and build together.

## **AI-first Approach**

At Meesho, we are building for the future with AI at our core. From pioneering use of AI-native developer tools to applying advanced machine learning across the entire e-commerce value chain, we're redefining what engineering at Bharat-scale looks like.

Case in point: we built India's first GenAI-powered voice bot and developed the BharatMLStack - a production-grade ML platform designed in-house and now proudly open-sourced for the tech community.

If you're excited by the intersection of cutting-edge AI and real-world impact at Bharat scale, Meesho is the place for you!

## **About the Role**

As an SDE I at Meesho, you won't just write code, you'll shape the future of e-commerce for Bharat. We're solving some of the most complex and high-impact problems at scale. With a culture rooted in creative problem-solving, fast-paced development and passionate product delivery, you'll be part of an innovation-led ecosystem where creativity meets execution.

What you'll do:

- Collaborate across teams to design and build new features that drive user impact and business growth
- Leverage state-of-the-art technologies and write high-performance code
- Take end-to-end ownership of features, from ideation to production

## **Technical Requirements:**

- Good problem-solving skills and technical aptitude..
- Strong foundation in computer science, excellent understanding of data structures and algorithms, and their space & time complexities.
- Strong hands-on and practical working experience with at least one of the following programming languages: Java/Golang/Python/Javascript/C++/Node.
- Excellent coding and debugging skills — should be able to convert a problem statement into solution with code fluently.

## **Compensation offered -**

Total CTC (INR): **57,00,000 per annum**

- Fixed Compensation: **22,00,000 per annum**

- **Joining Bonuses:**
  - **Year 1: INR 7,00,000**
  - **Year 2: INR 8,00,000**
  - **Year 3: INR 9,50,000**
  - **Year 4: INR 10,50,000**

**Internship Stipend: INR 1,30,000**

**Eligibility Criteria:**

This role is open only to students from the **2026 batch pursuing B.Tech**, with specialisations in **Computer Science, Information Technology, or Circuit-related streams**.

**Other Perks and Benefits:**

- Flexible work hours and a healthy work-life balance.
- Regular team outings, fun activities, and engagement in various clubs.
- Opportunity to work with a diverse and talented team.
- Exposure to different business verticals and the chance to make a significant impact.
