

Job Title - Software Engineer

Who Is Okta? | About Okta

Okta is an enterprise-grade identity management service, built from the ground up in the cloud and delivered with an unwavering focus on customer success. With Okta you can manage access across any application, person, or device. Whether the people are employees, partners, or customers, or the applications are in the cloud, on-premises, or on a mobile device, Okta helps you become more secure, make people more productive, and maintain compliance. The Okta service provides directory services, single sign-on, strong authentication, provisioning, workflow, and built-in reporting. It runs in the cloud on a secure, reliable, extensively audited platform and integrates deeply with on-premises applications, directories, and identity management systems

Location:

India Innovation Centre, Bangalore

Position Description:

We are looking for engineering graduates who are ready to kickstart their careers! You will join one of our Engineering Domains where you will address real-world challenges and create innovative value for our customers. We are looking for problem solvers who care about making a meaningful impact for our customers and enjoy working as part of a collaborative, distributed team. As a new grad, you will be supported along the way and will have opportunities for continuous learning and mentorship.

Job Duties and Responsibilities:

- Design and implement high-performance, scalable, reusable and maintainable software
- Work with engineering teams to define project scope and understand our planning process
- Participate in test-driven development, design and code reviews
- Contribute iterative improvements to our systems
- Collaborate across Engineering, Product Management, Security and Design teams to solve technical and non-technical challenges

Minimum Required Knowledge, Skills, and Abilities:

- Graduated with a Bachelor's degree in Computer Science
- Interest in software development experience, and testing that supports building highly reliable, mission-critical software
- Ability to program in at least one OO programming language (e.g. Java, Golang and/or Python)
- Javascript and React experience
- Understanding of concepts like Web Services, SOA, REST APIs
- Able to apply knowledge gained in computer science courses to real world problems

Preferred Skills:

- Working knowledge of web technologies (such as HTTP, HTML/DOM, JavaScript, CSS, AJAX) will be beneficial.
- Familiarity developing containerised applications and deploying it to Kubernetes on cloud infrastructure vendors like AWS, Azure, GCP.
- Enjoy being part of a highly collaborative, remote-friendly environment.
- You've built, broken, and rebuilt software applications. We're looking for creative thinkers who also know how to create real-world products.

What You Can Look Forward to as a Full-Time/Intern at Okta

- Projects with real-world impact
- Mentorship and career growth
- Inclusive culture and fun communities
- Social impact opportunities
- Great perks and flexibility
