Software Engineering Intern – Job Description

Job Title:
Software Engineering Intern

Location:
Hyderabad

Duration:
6 months

About the Team:
We are the IT & Software Engineering department at Garmin building scalable and innovative digital solutions for internal and external users. The interns will work closely with experienced engineers, and get a chance to join a team of software professionals who all work together to achieve the best results for our customers. They will be working in a dynamic and agile environment surrounded by people with a pioneering spirit and passion for challenges.

Responsibilities:
- Developing API's, which are scalable, supportable, and reliable that service the entire Garmin ecosystem
- Write clean, maintainable, and documented code
- Participate in team meetings, code reviews, and sprint ceremonies
- Troubleshoot, debug, and resolve issues under supervision
- Work with mentors to meet learning goals and project objectives
- Maintain documentation of code, processes, and learnings

Skills & Qualifications:
- Pursuing a degree in Computer Science, IT, or a related field
- Familiarity with one or more programming languages (e.g., Java, Python, JavaScript)
- Basic understanding of software development concepts (OOP, data structures, algorithms)
- Eagerness to learn and contribute in a collaborative team environment
- Good communication and problem-solving skills

Nice to have (optional):

- Exposure to Git, OpenStack, kubernetes or VueJS

What You'll Learn:

- Hands-on experience with enterprise software development
- Exposure to agile development and DevOps workflows
- Mentorship from experienced software engineers
- Opportunity to convert to a full-time role (based on performance)
